Pneumococcal			PCV	PCV	PCV	PCV				PCV	PPV		
- - - - - Vaccines below red line are for selected populations - - - - -													
Hepatitis A										Hepatitis A Series			
Influenza					Influenza (Yearly)								

This schedule indicates the recommended ages for routine administration of currently licensed childhood vaccines, as of December 1, 2002, for children through age 18 years. Any dose not given at the recommended age should be given at any subsequent visit when indicated and feasible.

Green bars indicate age groups that warrant special effort to administer those vaccines not previously given. Additional vaccines may be licensed

and recommended during the year. Licensed combination vaccines may be used whenever any components of the combination are indicated and the vaccine's other components are not contraindicated. Providers should consult the manufacturers' package inserts for detailed recommendations.

Range of recommended ages
Preadolescent assessment
Catch-up vaccination
Only if mother HBsAg(-)
